SUPERFLEX MULTI-PURPOSE HOSE

GLH SERIES

PRODUCT OVERVIEW

Fairview GLH Series Superflex Multi-Purpose Hose is engineered for pneumatic hand tool and shop air applications where flexibility, lightweight construction, and durability are required. Designed to remain flexible even at extremely low temperatures, the GLH Series offers superior handling characteristics and a 300 PSI working pressure rating, making it an excellent choice for general industrial air service.

Dash Size	Actual I.D.	Hose O.D.	Working Pressure	Standard Length
-4	1/4"	0.500"	300 PSI	500 ft
-6	3/8"	0.625"		
-8	1/2"	0.781"		

Property	Specification
Working Pressure	300 PSI
Temperature Range	-55°C to 65°C (-65°F to 150°F)
Oil Resistance	RMA Class B
Available Colors	Green, Red, Yellow
Packaging	Loose Coils or Plastic Core Reels

APPLICATION

- Pneumatic hand tools
- Shop air systems
- Compressed air service
- Industrial air lines
- General-purpose air transfer

FEATURES

- Excellent low-temperature flexibility
- Lightweight construction
- RMA Class B oil resistance
- Spiral high-tensile yarn reinforcement
- Available in multiple colors
- Compatible with hose barb fittings
- Hose end guards available

NOTE:

- Working pressure ratings are based on 70°F (21°C).
- Increases in ambient or internal temperature will reduce the working pressure rating.
- Verify hose compatibility with the intended application prior to installation.
