PIPE THREAD SEALANT

METALLIC COMPOUND™ SERIES

PRODUCT OVERVIEW

MASTERS® METALLIC COMPOUND™ is a heavy-duty pipe thread sealant for metal and plastic threaded connections. This all-weather formula lubricates threads during assembly, remains flexible in service, and allows for easy disassembly even after years of use. The compound is non-corrosive, helps prevent galling and seizing, and effectively seals most liquids and gases.

Part Number	Description
TTSM-250	250 mL (1/2 Pint) Brush-Top Can
TTSM-1000	1 L (1 Quart) Can

Property	Specification
Max Pressure	6,000 PSI
Temperature Range	287°C (550°F)

Low VOC

c UL us LISTED

FEATURES

- Heavy-duty sealing compound
- For metal and plastic threads
- Prevents galling and seizing
- Non-corrosive formula
- Will not dry out or harden in the container
- Easy disassembly after service

APPLICATION

- Compressed air systems
- Natural gas systems
- Propane and LPG systems
- Fuel oil systems
- Hydraulic systems
- Steam systems
- Refrigeration systems
- General industrial threaded connections

Certifications & Compliance

- ULC listed for Natural Gas (CAN/ULC-S642).
- Low VOC.
- WHIMIS labelled

NOTE:

- Contains lead. Clean hands and work surfaces after use.
- Not safe for use on oxygen systems.
- Exercise caution with chemicals having low surface tension.
- Verify compatibility with the intended media prior to use.
